CIT 140 · Week 4 · Cedar Junction

Validated Requirements Set

Week 4 · Revision 2122

R-01 · functional

Requirement: The system must distinguish between a visitor whose appointment is held pending final confirmation and a visitor whose appointment is confirmed and ready

Source: W04-S01 · Dana Ruiz

Rationale: A held appointment indicates that the visitor has arrived but cannot proceed yet.

Acceptance check: Given an appointment that is awaiting the final confirmation.

Priority: Must · **Validation:** Confirmed by Dana Ruiz

Conflict or decision: A held status means the visitor’s case is not yet cleared to proceed because a required condition remains unmet

R-02 · user

Requirement: Staff must be able to identify when an appointment is held pending final confirmation

Source: W04-S01 · Dana Ruiz

Rationale: Clear status information helps staff explain the situation to the visitor

Acceptance check: Present staff can confirm the intake workflow, but privacy rules and clinical capacity.

Priority: Must · **Validation:** Confirmed by Dana Ruiz

Conflict or decision: A held status means the visitor’s case is not yet cleared to proceed because a required condition remains unmet

R-03 · business

Requirement: The system must only offer a same day appointment slot when both a suitable room and qualified clinician is available

Source: W04-S02 · Dr. Lena Okafor

Rationale: An open calendar slot does not guarantee that the service can be a delivered

Acceptance check: Given the same day appointment slot, when either the room or the qualified clinician is unavailable

Priority: Must · **Validation:** Confirmed by Dr. Lena Okafor

Conflict or decision: Readiness can be confirmed only after all required checks are complete, the necessary information and documentation have been verified

---

R-04 · functional

Requirement: The system must notify affected staff and visitors when readiness changes after an appointment.

Source: W04-S02 · Dr. Lena Okafor

Rationale: A confirmed appointment may no longer be feasible if room availability or clinician readiness changes

Acceptance check: Given a confirmed appointment or when readiness changes then the system notifies affected staff and visitors.

Priority: Must · **Validation:** Confirmed by Dr. Lena Okafor

Conflict or decision: Readiness can be confirmed only after all required checks are complete, the necessary information and documentation have been verified

R-05 · user

Requirement: The system must preserve the visitors approved communication preferences and language needs

Source: W04-S03 · Priya Shah

Rationale: Visitors need consistent communication and approved support

Acceptance check: Veirfy that the approved preferences and support needs remain available

Priority: Must · **Validation:** Confirmed by Priya Shah

Conflict or decision: At every handoff, authorized staff must communicate the visitor’s relevant support needs, agreed accommodations

---

R-06 · constraint

Requirement: The system must provide an equivalent phone-based or staff-assisted alternative for visitors who cannot use the visitor portal, covering appointment confirmation, rescheduling, and check-in.

Source: W04-S03 · Priya Shah

Rationale: Visitors must be able to access the service regardless of their ability to use the digital portal.

Acceptance check: Given a visitor cannot use the portal, when they request assistance by phone or through staff

Priority: Must · **Validation:** Confirmed by Priya Shah

Conflict or decision: At every handoff, authorized staff must communicate the visitor’s relevant support needs, agreed accommodations

R-07 · nonfunctional

Requirement: The system must display only the minimum status information staff need to perform their assigned tasks on shared displays

Source: W04-S04 · Jordan Kim

Rationale: Minimizing information exposure protects sensitive information

Acceptance check: Given a status has been changed, when an authorized auditor views the status-change history

Priority: Must · **Validation:** Confirmed by Jordan Kim

Conflict or decision: Apply role-based, least-privilege access so staff can view or change only the information necessary for their responsibilities

---

R-08 · functional

Requirement: The system must retain the status-change history, including who made the change

Source: W04-S04 · Jordan Kim

Rationale: Maintaining a complete audit trail supports accountability, traceability, and exception reviews

Acceptance check: the system displays who made the change, the previous value, the new value, and the time of the change.

Priority: Must · **Validation:** Confirmed by Jordan Kim

Conflict or decision: Apply role-based, least-privilege access so staff can view or change only the information necessary for their responsibilities

---

Professional Guidance Assessment

IIBA: IIBA promotes analysis standards and professional engineering

ISO/IEC/IEEE 29148: They provide standards for requirement engineering

PMI: PMI focuses on project management and successful project delivery

Application: The guidance helped made it clear, traceable, and testable
